Appropriate Use of the Internet by Children.

How we keep children safe online at SBPS

- All iPads are password protected.
- Parental controls are set to 'clean'.
- Web sites are restricted via the control settings.
- Children are supervised during iPad play.
- The tilt and touch is used via icons only and any access to google is controlled by adults.
- All Kindles are preprogrammed with suitable games via Kid's Kindle.
- Kindles are not attached to the wifi or any internet source at preschool.

We support the safe use of the internet at home by:

- Informing parents of web sites to help to set up parental controls.
- Sharing the story of Smartie the Penguin both at preschool and at home.
- Sharing websites that promote how to keep children safe online.
