

## Sun cream application policy and procedure.

- Parents are asked to apply sun cream each morning during sunny periods of weather. They are also asked to put a named bottle of cream in their child's bag for re-application. By providing us with a named bottle we inform parents that this implies permission to apply.
- Only apply the child's own sun cream unless signed permission has been gained from the parent to apply the setting cream which is to be used in emergencies if the parent has forgotten.
- Ensure a full coverage of cream on exposed skin.
- Only regular staff with current DBS to apply cream.
- Apply cream after exposure to water, if it looks like they are catching the sun and after lunch for those children staying all day.
- If we have no cream and no permission then do not apply cream. The child will need to stay inside or in shaded areas for a short period of time.
- Permission to apply preschool cream can be obtained by text or phone if possible in emergencies.
